

### Private Sessions:

Our private sessions are designed for the student that requires one-on-one attention to reach their potential. Each session is 30 minutes long with a single subject focus of either math or literacy. Each session is planned and tailored to your child's learning style. Whether that be auditory, kinesthetic, or visual, our sessions are made to accommodate all learners. We use proven strategies and techniques, for helping your child gain confidence and develop independence, all while having fun!
